

V-Ray for Revit

Installation Guide for Windows

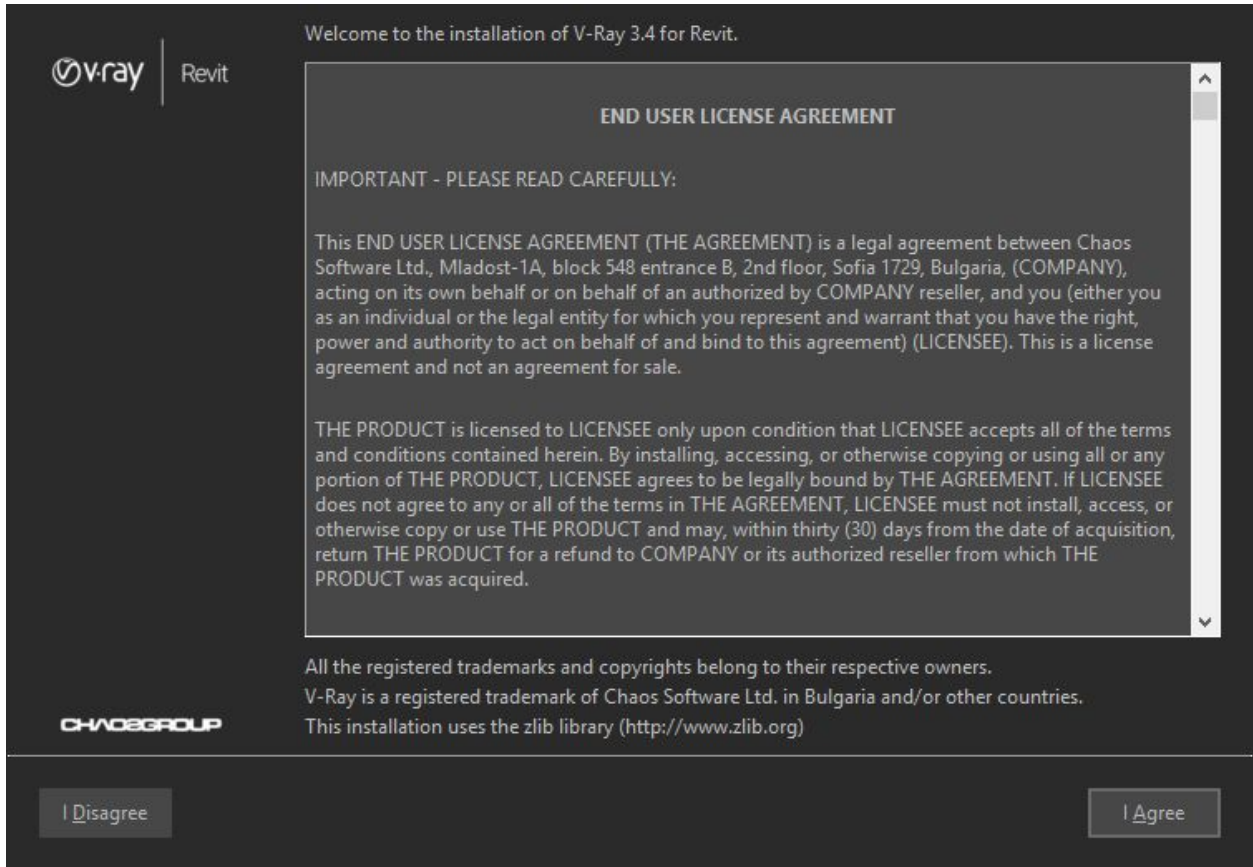

Installing V-Ray for Revit

To install V-Ray for Revit make sure your Windows account has administrative privileges and double-click the installer to run it:

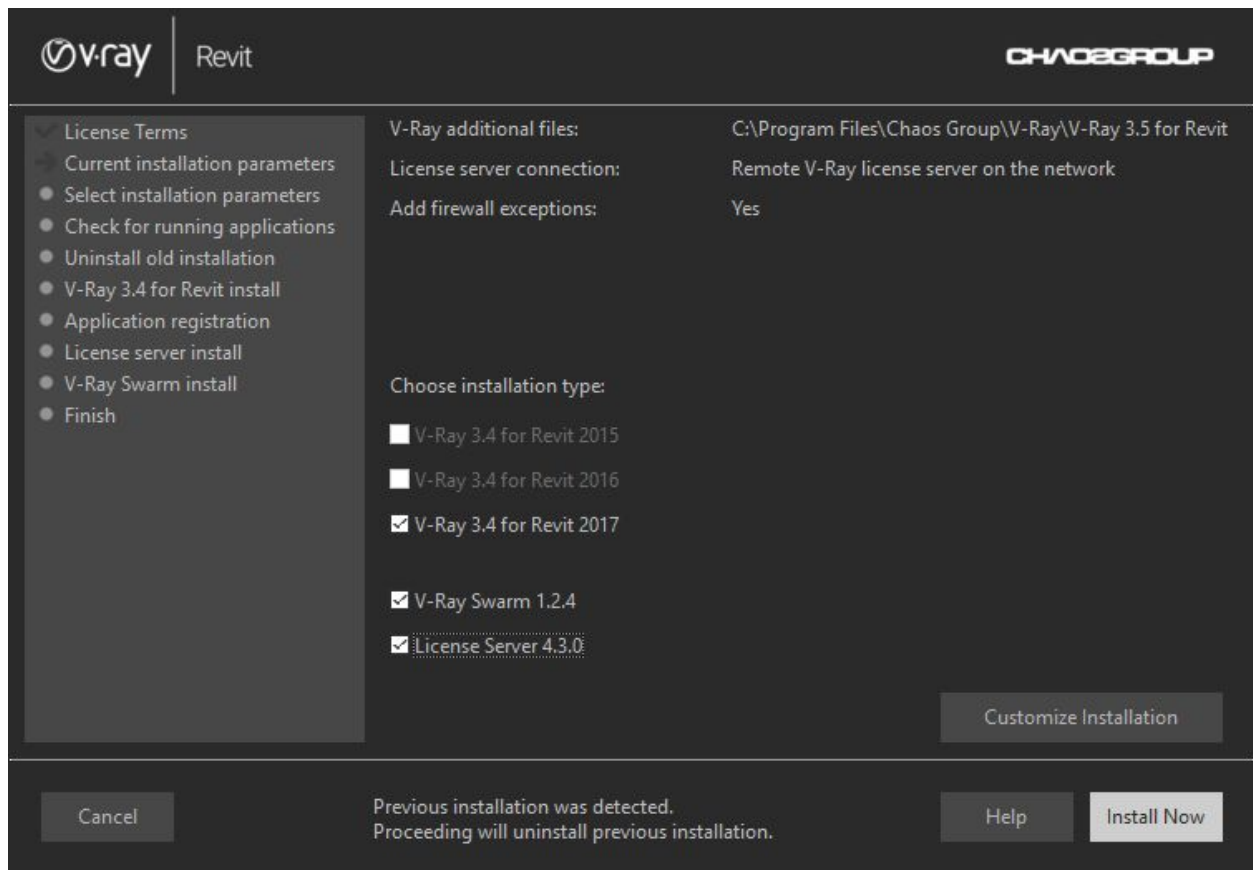

Revit Version	Installer Name
Revit 2017 x64	vray_adv_34002_revit_win_x64.exe
Revit 2016 x64	vray_adv_34002_revit_win_x64.exe
Revit 2015 x64	vray_adv_34002_revit_win_x64.exe

To complete the installation follow these steps:

You will be presented with the V-Ray licensing agreement. Please take a moment to review the agreement. Click the **I agree** button to proceed:

Next, you can select the installation type. The installer should detect the root folder automatically. Please make sure that the destination is correct. You can also choose to customize the installation.

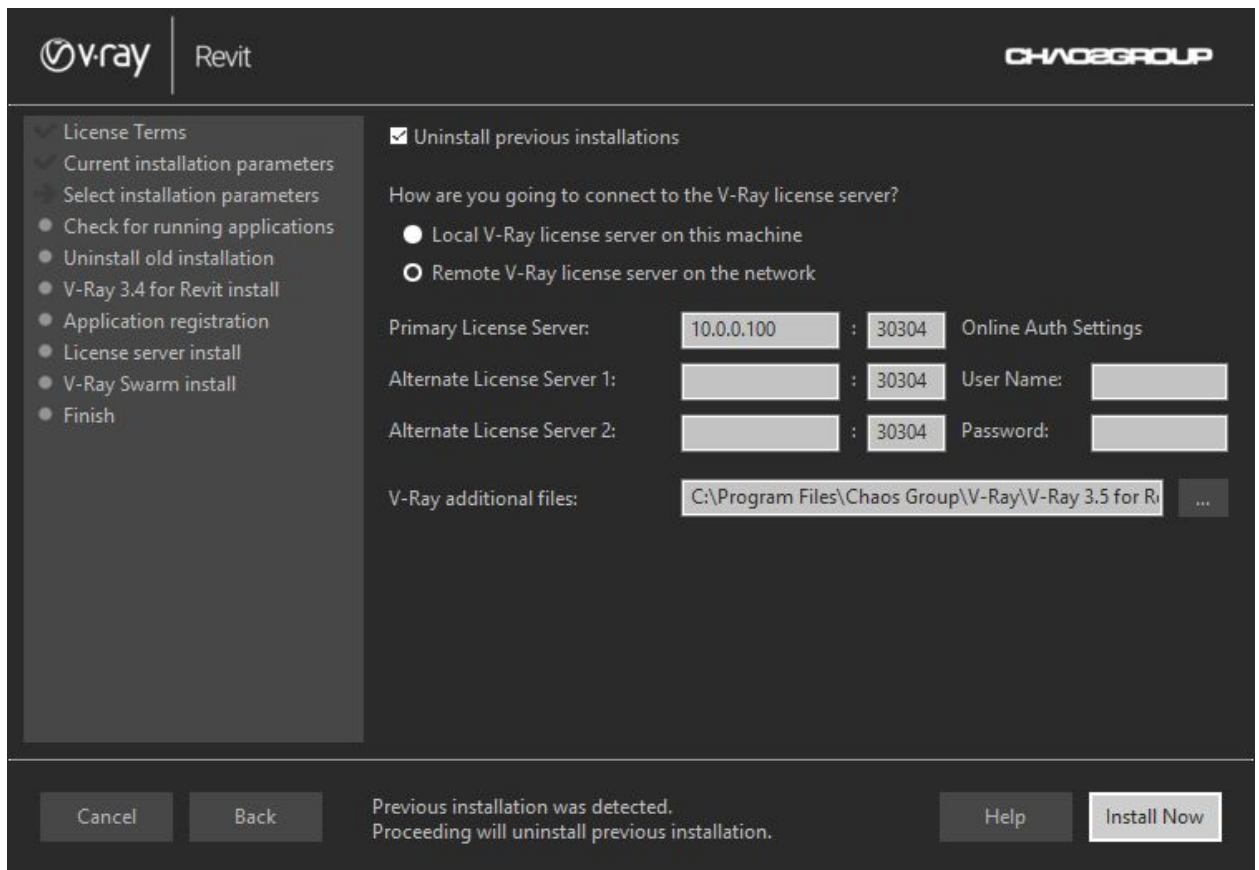

If you have clicked the **Customize** button, you will be able to adjust some installation settings:

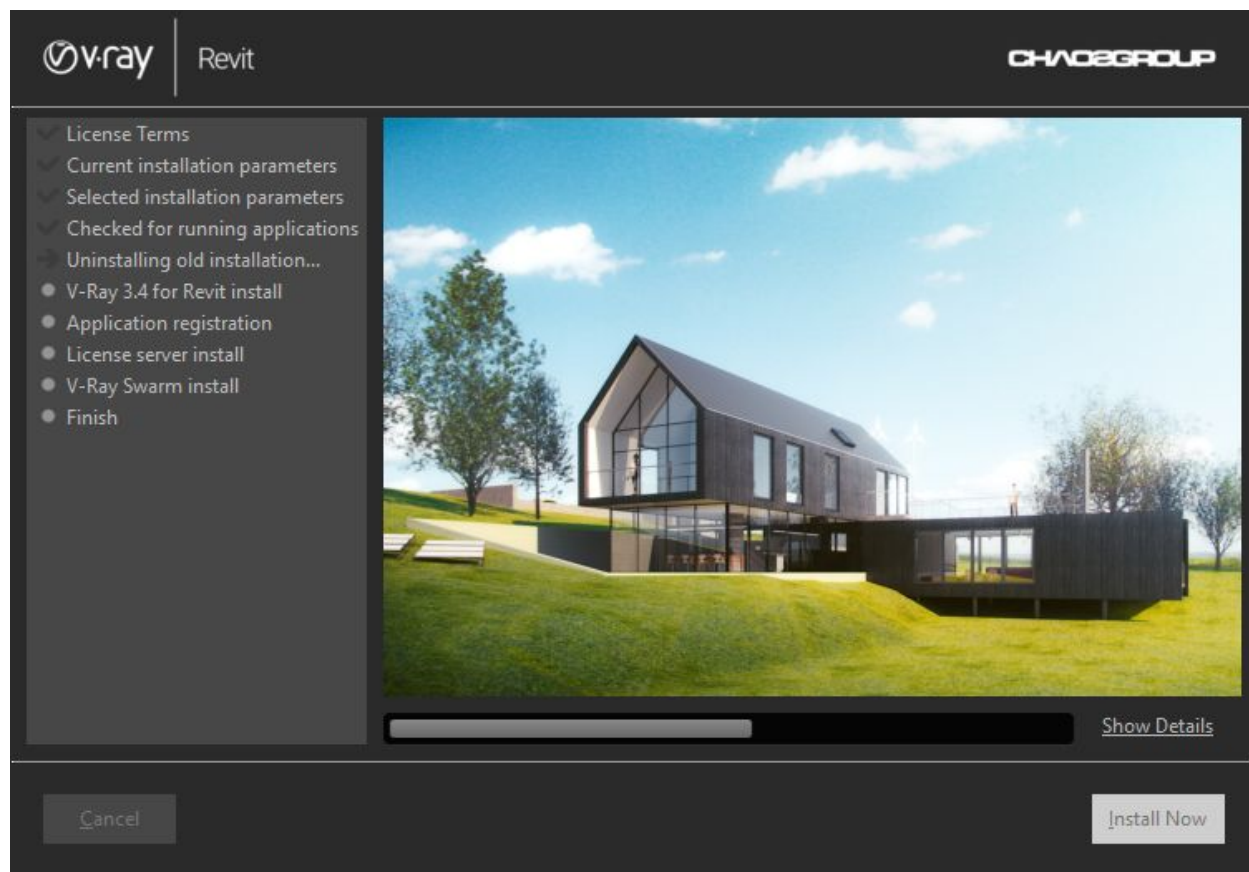

Uninstall previous installations – leave this checked to automatically uninstall any previous installations.

How are you going to connect to the V-Ray license server – specifies whether the V-Ray license server will run locally or on another machine.

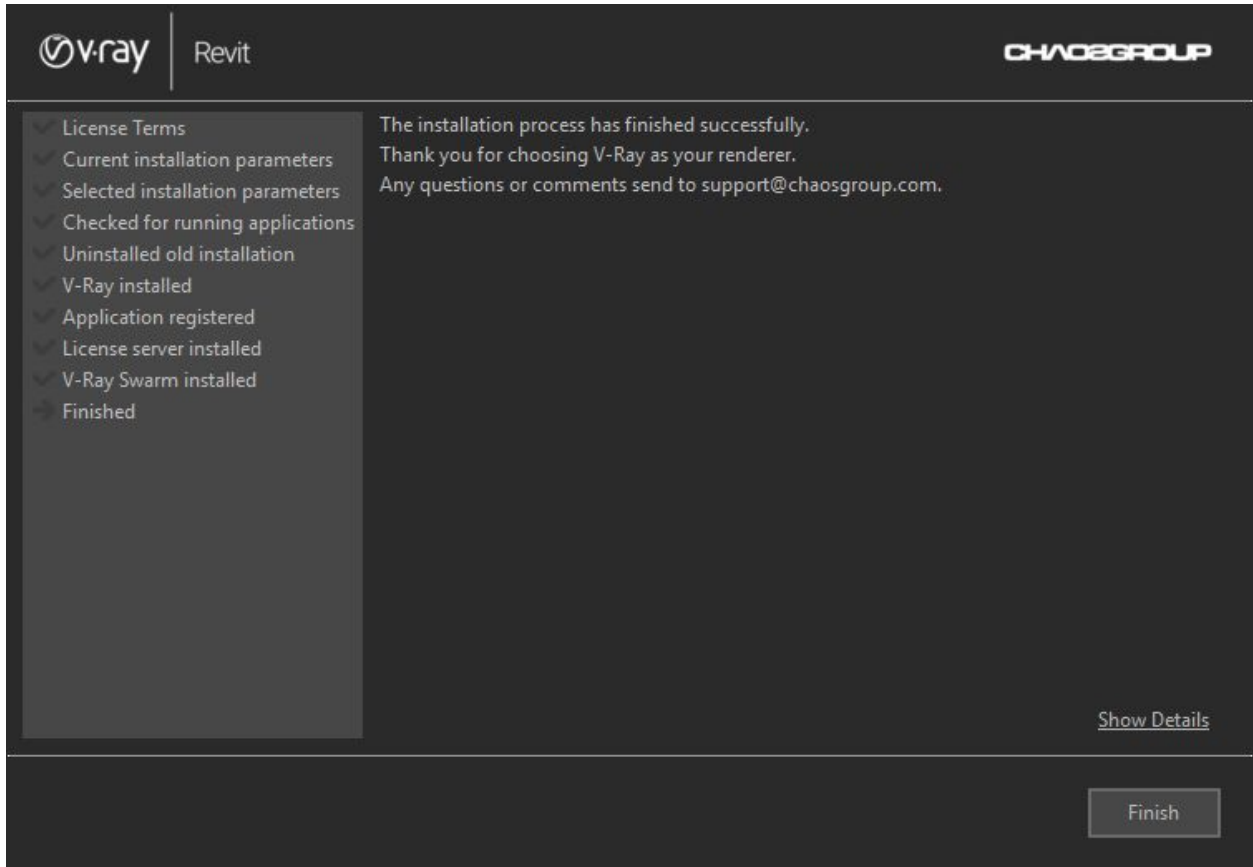

Specify installation paths – please check if the default folders are correct.

Click **Install Now** to begin the installation.

If the installation was successful, you will get this screen:

Click **Finish** to complete the installation.

V-Ray License Server

After installing V-Ray, the V-Ray License Server installation window will appear next.

For more information, see how to [set up your license](#).
